

Open yours eyes to experience the beauty of a waterfall, transporting you to a soothing, tranquil setting that just happens to be your own backyard.

Revel in the thought that your children are enjoying your personable koi as they suck on their toes at the side of the pond. Delight in the idea of placing unusual plants in and around your pond and watching them blossom. Enjoy the presence of wildlife all around you as frogs, birds, and dragonflies buzz around your watery ecosystem. It's possible to create a low-maintenance, watery paradise in your backyard. Live the lifestyle you deserve...let us show you how.

Call us to get the Create A Paradise DVD

The Create A Paradise DVD allows you to experience for yourself the joys of owning a water garden. With example after beautiful example, designing and locating a water feature in your yard will no longer be a mystery. Ask your water garden professional for a copy and start dreaming!

Visit www.aquascapeinc.com for more great information on water features.

Own your very own...

...Magical water garden!

popularity

Reconnect with Nature

Water features are today's hottest trend in landscaping. Across America, high maintenance, boring expanses of lawn are being transformed into beautiful, low maintenance water features. Every day millions of people return home to a little paradise... their own backyard!

natural

Environmentally Friendly & Safe

Environmentally friendly and completely customized water features can be installed anywhere similar to traditional landscaping. In addition, water features like other types of landscaping, mature with age, increasing the value of your house more than any other type of home improvement.

aquatic plants

Jewels of the Garden

Water plants are truly the "emerald" jewels of the gardening world. Self-watering and hardy, these plants return year after year. You can even plant tropical lilies that bloom at night! Beautiful and low maintenance aquatic plants provide a truly unique accent to any water garden.

fish

The Perfect Pet

The flash of brilliantly colored fish adds immensely to the enjoyment of your water garden. In fact, fish actually help support the natural ecosystem and reduce pond maintenance. Their sparkle and playfulness offer endless fascination, enhancing the naturalness of the setting.

landscaping

Complete Your Paradise

No pond is complete without an adjacent deck, brick patio, or gazebo. Because moving water encompasses all senses, your water feature should be the focal point of your yard. Often a deck or patio can be incorporated for a more up-close and personal appreciation of your water feature.

tranquility

Right in Your Own Yard

Relax alongside a water garden and experience a tranquility that transcends today's stressful world. Recuperate from your hectic day with free moments, listening to the soothing sound of a waterfall. Join the many satisfied homeowners who readily profess adding a water feature to their landscape was the best investment they've ever made.

The Aquascape Ecosystem

SKIMMER

- Eliminates routine maintenance by removing debris before it sinks to the bottom of the pond, allowing pond construction anywhere, even beneath trees.
- Hides the pump and plumbing from view alongside your pond instead of in the pond.
- Won't drain the pond if a leak develops in the plumbing or waterfalls.

BACTERIA

- Products like AquaClear™ Extreme bacteria help maintain clear and healthy water, and S.A.B.™ Extreme assists in the breakdown and reduction of debris in the pond.

PLANTS & PLANT POCKETS

- Helps hide unsightly lily containers.
- Allows the roots to grow more abundantly and plants to bloom more freely, consuming excess nutrients and reducing debris in the pond.

LINER

- Strong 45-mil EPDM liner is the best choice for most pond installations.
- Easy and inexpensive to install and won't crack.

FISH

- Fish, like koi and goldfish, can be successfully kept in water that is only two feet deep as far north as Zone 4.

UNDERLAYMENT

- A non-woven, needle punched underlayment forms a soft padding for the liner.
- Unlike sand, carpet padding, and newspaper, it easily covers the vertical surfaces of the pond shelves.

ROCKS & GRAVEL

- Adding rocks and gravel helps reduce pond maintenance by providing surface area for beneficial bacteria to colonize.
- Covering the pond liner with gravel protects the liner from harmful UV rays and damage from animals and other sharp objects.
- A stone bottom looks far more natural and is safer to walk on than an exposed, slippery rubber liner.

BIOFALLS™ FILTER

- Creates a perfect base for building beautiful, leak-free waterfalls.
- Simple, uncluttered design with no moving parts to break.
- Built-in rock ledge allows this filter to be completely camouflaged.
