SECTION VI REACTIVITY DATA-----

- STABILITY: Stable under normal conditions
- CONDITIONS TO AVOID: Heat/Sources of Heat · Water/Moisture · Acids · Bases · Reducing Agents · Organic Materials
- MATERIALS TO AVOID: Oxidizing agents attack the organic components of these products. As with other organic carbonaceous compounds, these reactions result in heat which is contained in a confined space can cause fires. Hypochlorites, chlorinated isocyanurates, and perborates are examples of oxidizing agents.
- HAZARDOUS DECOMPOSITION PRODUCTS: No uniquely hazardous decomposition products are expected. If the organic portion of product is burned, as with any nitrogen containing organic material, oxides or nitrogen, carbon dioxide, and water can be produced. Partial combustion may produce, in addition to the above, soot and various oxides of carbon.

SECTION VII - SPILL, LEAK, AND DISPOSAL INFORMATION-----

WASTE DISPOSAL: Do Not return spilled or contaminated material to inventory. Clean the area with large quantities of clean, cold water.

CLEAN UP: Collect the product with suitable means, shovel, and sweep, avoiding dust formation.
