

Join us as we change the way the world looks at water!

The Lakes of Bliss Woods has a unique opportunity to show the world how to transform a traditional neighborhood into a more sustainable and environmentally focused community!

Ed, Ellen, and Aquascape are starting a grass roots movement to make a difference on how we use and see water one yard at a time.

With our annual training event "Pondemonium" we are going to offer our neighbors an opportunity to take part in this event at many different levels.

Pondemonium is a huge training event for the Water Garden Industry where over 400 professionals will be coming to learn how to install water features including rain water harvesting systems, rain barrels and rain gardens.

Our Neighborhood will serve as their classroom putting Sugar Grove on the map as a leader in water sustainability.
