

INSTRUCTIONS FOR USE:

HOW MUCH: One scoop (5 cc) treats 125 gallons (472 liters).

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN: We recommend one dose every other day. If symptoms persist after three doses, perform a 25% water change and repeat treatment.

HOW TO: Dilute dry treatment in one gallon of water and distribute evenly or in an area with good water circulation.

PLEASE NOTE: It is important to accurately dose. Carefully calculate the water volume before adding. Discontinue the use of UV clarifiers/sterilizers or chemical filtration, including use of carbon, zeolite, or ion exchange resins. **Ensure proper oxygenation during treatment. Water temperature should be a minimum of 32°F (0°C).**

CAUTION: May cause skin irritation. Avoid contact with skin, eyes, or clothing. For use with ornamental, contained water gardens, and ornamental fish only. Not for human use. Keep out of the reach of children. Keep container closed tightly and in a cool dry place. Not to be given to fish intended for food use.
