

INSTRUCTIONS FOR USE:

HOW MUCH: One ounce treats up to 600 gallons (2,268 liters).

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN: Use as needed. Allow 48 hours between doses.

HOW TO: Add to the area with the most circulation. We recommend heavily aerating for at least 24 hours after application.

PLEASE NOTE: For best results, use Rapid Clear Fine Filter Pads (#80001) in the skimmer to trap clumped debris. Do not overdose, as it will prevent proper flocculation. Product may not be effective on dark, tannin-stained water.

Keep out of reach of children. Store at room temperature.
