

INSTRUCTIONS FOR USE:

HOW MUCH: Use the graduated measuring cup to determine exact dosage based on pond water volume. One scoop (1 cup) treats approximately 6,000 gallons (22,680 liters).

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN: Once per week until desired result is achieved.

HOW TO: Add to the area with the most circulation. **We recommend heavily aerating for at least 24 hours after application.** Do not exceed the recommended dosage.

PLEASE NOTE: Water temperature should be a minimum of 32°F (0°C). **Keep out of reach of children.** Store at room temperature.
