

INSTRUCTIONS FOR USE:

HOW MUCH: One bag treats 1,000 gallons (3,780 liters). For smaller ponds, divide into appropriate portions and reseal the bag for additional applications.

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN: We recommend adding new pellets every 6 to 8 weeks, overlapping treatment by two weeks to ensure adequate enzyme production.

HOW TO: Place bag in the area with the most circulation.

PLEASE NOTE: Keep out of reach of children.
Store at room temperature.
