

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

HOW MUCH: Add 1 teaspoon (5 ml) of Algaecide for every 50 gallons (190 L) of pond/fountain water.

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN: Once algae growth is under control, add one dose every 5 days. Weekly doses of Algaecide will control growth and reduce pond/fountain maintenance.xxxx

HOW TO: Before using Algaecide, make certain that the pond has vigorous aeration Thoroughly mix Algaecide into pond/fountain by adding near the pump outflow, water-fall, or aeration device. Algaecide can be mixed in a bucket of pond/ fountain water; repeat dose every three days until algae is controlled. Be prepared to siphon out dead filamentous algae.

CAUTION: Algaecide can be used in ponds with live plants. Do not use with crustaceans, including crabs, shrimp and freshwater lobsters. For ornamental pond use only where all water is contained without any out flow.

WARM WEATHER CAUTION: Before using Algaecide, make certain that the pond has vigorous aeration - i.e., a fountain, waterfall, or aeration device to avoid fish loss due to low oxygen levels. When algae is removed by the filter or settles to the bottom of the pond/fountain, the oxygen level may drop to a harmful level if adequate aeration is not provided. Therefore, when using Algaecide during warm summer months, adequate aeration is required. Do not shut pond pumps and aeration devices off at night.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
