

INSTRUCTIONS FOR USE:

HOW MUCH: Use the graduated measuring cup to determine exact dosage based on pond water volume. One scoop (1 cup) treats approximately 6,000 gallons (22,680 liters).

CALCULATE POND SIZE: Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

HOW OFTEN:

Fall Maintenance: Start adding when water temperature drops below 50°F (10°C). Treat twice weekly for two weeks, then once per week.

Spring Maintenance: When water temperature is below 50°F, treat twice weekly for two weeks, then once a week until water reaches above 50°F (10°C).

HOW TO: Add to the area with the most circulation.

PLEASE NOTE: Keep out of reach of children.
Store at room temperature.
