

## **DIRECTIONS FOR USE**

**HOW MUCH:** Use the graduated measuring cup to determine exact dosage based on pond water volume. One cup treats up to 6,000 gallons (22,680 liters).

**CALCULATE POND SIZE:** Length (feet) x Width (feet) x Average Depth (feet) x 7.48 = US Gallons

**HOW OFTEN:** As needed, including after cleanouts or adding new water to the pond.

**HOW TO:** Add to the area with the most circulation. **We recommend heavily aerating the pond for at least 24 hours after application.** Do not exceed the recommended dosage.

**PLEASE NOTE:** Water temperature should be a minimum of 32°F (0°C). **Keep out of reach of children.** Store at room temperature.
